Hi Matthew –

I think it would be easier all around to do the training by webinar. I'm supposed to collect air samples today and am waiting for my colleague from Santa Fe to get here.

I'll have to have Bill here to help me with the webinar since I won't be able to read anyone's lips!

Have a safe trip back.

Kim

Well there are a couple of ways we can do this....I can do some training today.....or we can do it via webinar from Dallas since I am leaving here today. What ever works best for you!

Hi Matt –

Yes, we would like to receive training in SCRIBE, but I'd like for our air monitoring staff to attend and he won't be back in the office until July 12. If it's not possible to wait this long, I could attend a training session and then train Bill.

We're hoping to load our data directly to SCRIBE once we get trained!

Thank you all for your hard work and support in this effort.

Kim

Just a quick note, I am leaving Santa Fe today and heading back to Dallas. I have received data from the DOE-RAP team (not in Scribe but rather as excel or pdf files). I will load this data into SCRIBE for them and then we will publish it upon their approval. My question for you is did you want some training on SCRIBE or are you going to get us the data in flat files and then have us load the data. It has been great working with you.. and we are available from back in Dallas for any data support as well.
